Tennis

Ping-Pong

PROJECTS

[2020 – 2021]

Smart Advising System

Project Experience:

- Lead the development of the SAS (Smart Advising System) in collaboration with a cross-functional team.
- The system enables users to forecast the real price of mobile, car, and property listings by simply inputting relevant details.
- Contributed to the frontend architecture and user interface design, implementing features to enhance user experience and streamline data input processes.
- Collaborated closely with backend developers to integrate frontend components with the system's backend infrastructure.
- Utilized CSS, HTML, and JavaScript to create dynamic and responsive frontend interfaces, ensuring optimal usability across various devices.
